JAGDAMBA[®] SUPER SHINE

PREMIUM COLORED AL-Zn SHEET & COILS

Jagadamba Super Shine is a premium color-coated sheet made from a combination of aluminum and zinc, offered in a variety of colors. It incorporates the advanced technology found in Jagdamba Galva+, ensuring both superior durability and aesthetic appeal.

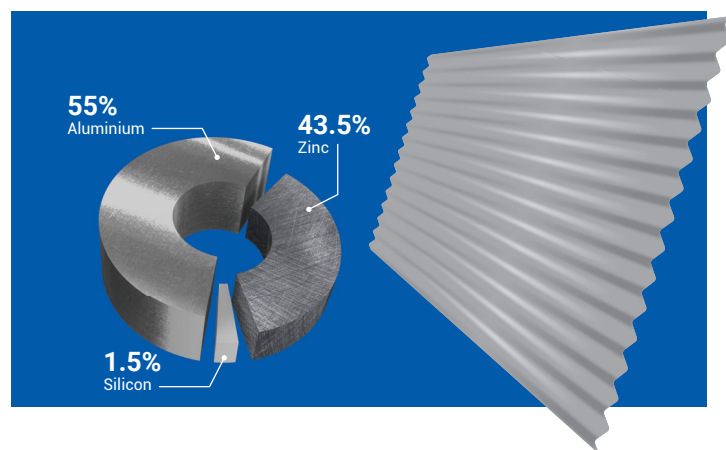

Features of Jagdamba Super Shine:

JAGDAMBA[®] GALVA+

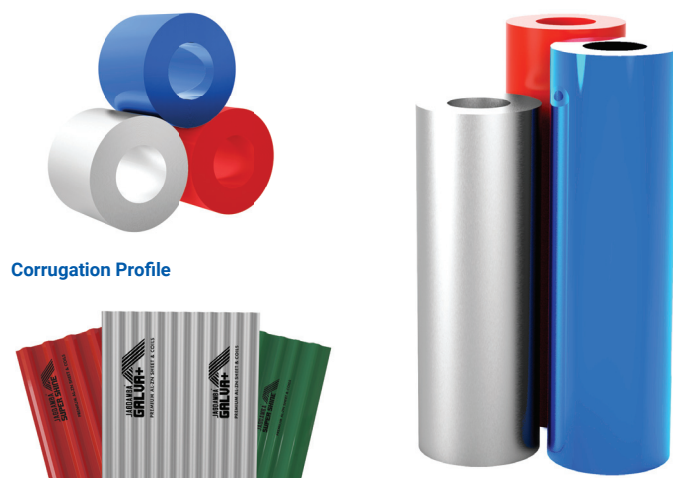

PREMIUM AL-Zn SHEET & COILS

Jagdamba Galva+ sheets, which are widely known as Galvalume, feature a coating made up of 55% aluminum, 43.5% zinc, and 1.5% silicon (by weight). This aluminum-zinc coating makes the sheets highly resistant to rust and corrosion, resulting in a lifespan four times longer than traditional galvanized sheets. Additionally, the aluminum-zinc coating enhances the product's weather resistance, shielding it from heat, rain, and corrosion. Due to these exceptional properties, Galvalume sheets have become the industry standard for quality, and Jagdamba Galva+ is considered the best and most distinctive Galvalume product available on the market.
